

Macintosh Remote Access Configuration Guide

Welcome to the Central Valley Internet Project (CVIP). In order to connect to CVIP, you must complete Section 1 – Connecting to CVIP for the First Time. In order to use Netscape to browse the web or use email, you must complete Section 2 – Configuring Email, News, Homepage and Proxies. Once your settings are saved, see Section 3 – Using Your CVIP Account when connecting to CVIP. The rest of this document contains useful information to make your Internet experience more enjoyable.

If you have questions or comments regarding these instructions or if you require technical assistance, please call our Technical Support line at 278-1111 ext. 2 (1-800-578-0905 ext. 2 if calling from the Coalinga, Dinuba, Firebaugh, Madera, Mendota, Oakhurst, Porterville, Reedley, or Visalia areas) daily from 7AM to 10PM. You can also send email to help@csufresno.edu. Additional tips and information may be found by clicking Member Services on the CVIP homepage <http://www.cvip.net/>.

You can access your account 24 hours a day, seven days a week. In order to provide current and reliable technology, we may schedule periods of downtime to maintain or upgrade our equipment. Outages are generally scheduled between 6AM and 8AM M-F and are posted on the Server Status page. Click Server Status on the CVIP Homepage then click the Scheduled Server Outages link. Unplanned outages are announced on the Technical Support line.

Thank you for participating in the Central Valley Internet Project. We hope your Internet experience will be useful and enjoyable.

Contents:

- Section 1 Connecting to CVIP for the First Time
- Section 2 Configuring Email, News, Homepage and Proxies
- Section 3 Using Your CVIP Account
- Section 4 Exploring the Internet
- Section 4A Browsing the World Wide Web with Netscape
- Section 4B Using Electronic Mail with Netscape
- Section 4C Exploring Usenet News Groups with Netscape

Section 1 – Connecting to CVIP for the First Time

1. If it is closed, click open the **Desktop Control Strip**. (See Figure 1a)
Click the **Remote Access** button. (See Figure 1b)
Click **Open Remote Access**. (See Figure 1c)

(Figure 1a)

OR

- Pull down the **Apple** menu.
Select **Control Panels**.
Open the **Remote Access** control panel.

(Figure 1b)

(Figure 1c)

2. Pull down the **Remote Access** menu and click **AppleTalk**.
In **Connect via:** select **Remote only**.
Close the **AppleTalk** window.
Click the **Save** button.
Click the **OK** button.
3. Pull down the **Remote Access** menu and click **TCP/IP**. (See Figure 2)

In **Connect via:** select **PPP**.
In **Configure:** select **Using PPP Server**.
Server.

In **Name server addr:** type:

129.8.50.105

press enter and type:

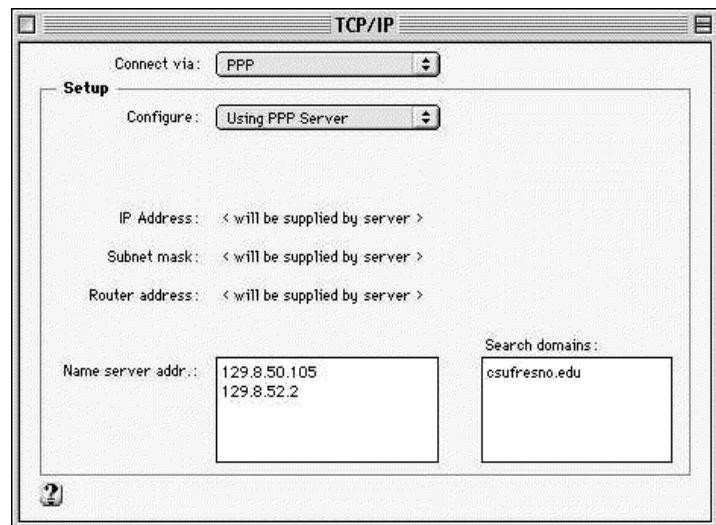

129.8.52.2

In **Search domains:** type:

csufresno.edu

Close the **TCP/IP** window.

Click the **Save** button.

(Figure 2)

4. In **Name**: type your account username.
(See Figure 3)

In **Password**: type your password.

Note: Enter the username and password exactly as they appear on your Internet Account Certificate. If you have ever changed your password, enter the current password.

Check **Save password**.

Enter the **telephone number**:

From On-campus: 88050
to disable call waiting: 145,88050

From Off-campus:
to disable call waiting ex: *70,291-0110

Fresno Area 291-0110

Coalinga 935-0197

Dinuba 591-0116

Firebaugh/Mendota 659-0102

Madera 675-0284

Oakhurst 658-9353

Porterville 781-1106

Reedley 643-0601

Visalia 733-1451

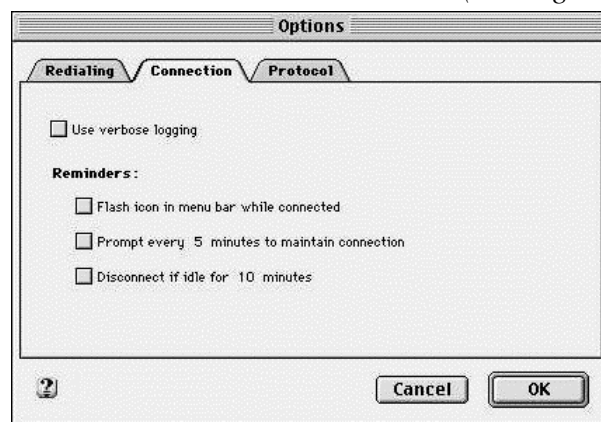

(Figure 3)

Note: Off-Campus Only If you must dial a special number to gain access to an outside telephone line, type the outside access number and a comma before the telephone number or call waiting code.

5. Click the **Options** button.

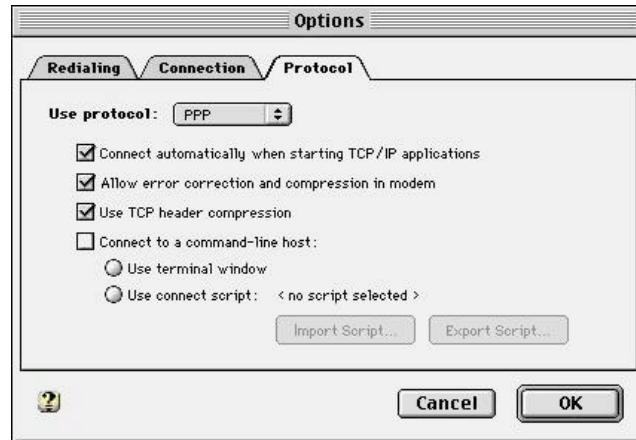

6. Click the **Connection** tab. Uncheck all four boxes. (See Figure 4)

(Figure 4)

7. Click the **Protocol** tab. Check only the first 3 boxes. (See Figure 5)

Note: If you receive any errors, click the **OK** button and repeat steps 1-5.

(Figure 5)

8. Click on **OK**.
7. Click on **Connect** to make your connection to CVIP.

Section 2 – Configuring Email, News, Homepage and Proxies

1. Pull down the Apple menu to Control Panel then click the Internet control panel.
2. Click on the **Personal** tab.
3. Type your **Name:** as you wish it to appear when you send email.
4. Enter your **Email Account:**
CSUF Students/Faculty/Staff: username@csufresno.edu
State Center Customers: username@scccd.org
All others: username@cvip.net
5. Click on the **Email** tab.
6. Enter your account username in the **User Account ID** field.
7. Enter your **Incoming Mail Server:**
CSUF Students: mail-student.csufresno.edu
CSUF Faculty/Staff: mail.csufresno.edu
State Center Customers: pop3.scccd.org
All others: email.cvip.net
8. Enter your **Password.**
9. Enter your **Outgoing (SMTP) Mail Server:**
CSUF Students: mail-student.csufresno.edu
CSUF Faculty/Staff: mail.csufresno.edu
State Center Customers: smtp.scccd.org
All others: email.cvip.net
10. Click on the **Web** tab.
11. Enter **Homepage:**
<http://www.cvip.net/>
12. Click the **News** tab.
13. Enter your **News host:**
news.csufresno.edu
14. Pull down the Edit menu and click on Advanced.
15. If you wish to view web pages faster or block some objectionable web pages, click the **Firewalls** tab and check the **Web Proxy** box. Otherwise, go to step
16. Enter either the cache proxy address (to view web pages faster):
<http://config-cache.csufresno.edu/proxy.pac>
or the filter proxy address (to view web pages faster and block some objectionable sites):
<http://config-filter.csufresno.edu/filter.pac>
17. Close the Internet Control Panel window.
18. Click the **Save** button to save your changes.

Section 3 – Using Your CVIP Account

Connecting to CVIP

Open an Internet program such as a web browser.

OR

If it is closed, click open the **Desktop Control Strip**.

Click **Default** on the pop-up menu.

Click the **Connect** button.

OR

Pull down the **Apple Menu**.

Select **Control Panels**.

Open the **Remote Access** control panel.

Click the **Connect** button.

Disconnecting from CVIP

Click the **Disconnect** button in the **Remote Access** control panel window.

OR

Click the **Remote Access** button on the **Desktop Control Strip**.

Click **Disconnect** on the pop-up menu.

OR

Pull down the **Apple Menu**.

Select **Control Panels**.

Open the **Remote Access** control panel.

Click the **Disconnect** button.

Section 4 - Exploring the Internet

You may use any web browser, email program or newsreader with your CVIP account. We use Netscape in our examples. Please contact Technical Support for assistance using other programs.

Netscape is a popular Internet application. Netscape can be found on your Macintosh by pulling down the **File** menu, clicking **Find**, typing **Netscape** and clicking the **Find** button. Double-click the **Netscape** application icon to launch Netscape. If you drag the application icon to your **Apple** menu, you can launch Netscape by pulling down the **Apple** menu and selecting **Netscape**.

Netscape can be used to:

- Browse the World Wide Web (the web)
- Send and Receive Electronic Mail (email)
- Post and Read Usenet News Articles (newsgroups)

For help using Netscape to perform these functions, start Netscape, click on the **Question Mark** menu and select **Help Contents**.

Section 4A - Browsing the World Wide Web Using Netscape

Central Valley Online will give you local information and will offer starting points to explore the rest of the web. By clicking on certain areas of the screen, you will be taken to new screens with more options and information. Try out the Internet Search option available from the main Central Valley Online page. Type in a keyword or two and explore the results.

To move around through the web, you can use any of the following methods:

1. Follow links on the screen. By clicking on underlined text or special icons or graphics, you will be taken to new pages of information.
2. Click in the **Netsite:** box (or pull down the **File** menu and select **Open > Location in Navigator**), type the URL and press enter. To use this option you must know the URL (or address) of the page you wish to view. URLs or web page addresses typically look like this:

`http://www.cvip.net/`

3. When you are on an interesting page, pull down the **Bookmarks** menu (to the right of the **Go** menu) and select **Add Bookmark**. To return to that page, pull down the **Bookmarks** menu and click the title of the page.
4. Click the **Back** and **Forward** buttons to go back or forward through the pages you have seen.
5. Pull down the **Go** menu and click one of the pages you've visited in your current session.

Section 4B - Using Email with Netscape Mail

To send or receive email, open Netscape and press <Apple>-2 or pull down the **Communicator** menu (to the right of the **Bookmark** menu) and select **Messenger** Inbox. Click the **Get Msg** button to get new email. Enter your password and click the **OK** button. You should see some Email messages: one from Mozilla, with information about using Netscape mail, and one from CVIP with information about your account. Please read both of these messages.

To send mail, click the **New Msg** button at the top of the window or pull down the File Menu and select **New > Mail Message** or press <Apple>-M. A new window will appear with fields to place the address of your recipient and a subject line, among others. Compose your message in the large field below. When you are finished with the message, click the **Send** button to send it.

For more detailed info about using Netscape Mail, read the message from Mozilla or refer to the Help Contents mentioned earlier.

Section 4C – Using Usenet Newsgroups with Netscape News

Netscape allows you to explore the world of online information and opinion available through the Usenet newsgroups. These groups contain a collection of topics and articles posted by Internet users across the globe. To access Usenet newsgroups, open Netscape and press <Apple>-3 or pull down the **Communicator** menu and select **Newsgroups**. Click the triangle to the left of your news server name to display the groups to which you are subscribed. Double-click the newsgroup name to view the articles in that group.

To view a list of all newsgroups, click the **Join Groups** button. Click the triangles to the left of folders to show groups within each subject area. Click under **Subscribe** to subscribe to a newsgroup. To find a newsgroup by name or subject, click the **Search for a group** tab, type the name or a subject and click the **Search Now** button. Click under **Subscribe** to subscribe to a newsgroup.

You should subscribe to the newsgroups news.announce.newusers, news.newusers.questions, and new.answers. These groups are a good place to start learning about Usenet Newsgroups.

To send an article to a newsgroup, click on the newsgroup name and click the **New Msg** button. Compose your article in the large field then click the **Send** button.

For more detailed info about using Netscape to read Usenet Newsgroups, read the message from Mozilla or refer to the Help Contents mentioned earlier.
